PROFESSIONAL PROFILE

A dedicated Austrian IT professional with considerable experience in a range of software environments and a specialisation in web technologies. Passionate about building maintainable services to digitise business processes and creatively realising business requirements. A proactive team member with excellent communication, planning and research skills, with a distinctive awareness and understanding of the languages of business and IT.

CAREER SUMMARY

- 2015 – current **Head of Web / Developer (Full-time)**, *all about apps GmbH*, Vienna, Austria.
Established, mentored and led a team of full-stack software engineers, administered internal services and shaped IT strategy and competitiveness through Technology Advisory Board. Specified and implemented backend services and responsive frontend / mobile hybrid apps. Improved overall project quality and lead time by introducing test-driven development, code conventions, template projects, auto-generated documentation and static typing.
- 2012 – 2013 **Software Developer (Practicum & Freelance)**, *FH Joanneum GmbH*, Graz, Austria.
Designed a framework (Apache Flex) to implement 20 different interactive exhibits for a permanent exhibition and coordinated deployment at *Universalmuseum Joanneum GmbH*, Graz, Austria.
- 2011 **Software Developer (Internship)**, *Management Partners GmbH*, Graz, Austria.
Designed and implemented a failover backup system which is now used by various hospitals. Automated detection of obsolete code in Microsoft Access components and T-SQL procedures.

EDUCATION

- 2011 – 2014 **Master Information Management**, *FH Joanneum University of Applied Sciences*.
Diplom-Ingenieur für technisch-wissenschaftliche Berufe (DI, MSc equivalent)
- 2008 – 2011 **Bachelor Information Management**, *FH Joanneum University of Applied Sciences*.
Bachelor of Science in Engineering (BSc)

KEY SKILLS

- ICT Proficient in all client- and server-side JavaScript environments, language standards (TypeScript, ES2017) and several HTML5 / CSS technologies; Expert knowledge in test-driven development, agile software development, entity-relationship modelling, relational (pg-, T- and PL-SQL) / NoSQL databases and specifying architectures for scalable RESTful / GraphQL API services
- Management Experienced in conducting project estimations, requirement analysis and representing the technical lead of a project in external meetings and through consulting activities; Practical knowledge of team development (recruitment, code review, stand-up) and leadership (performance review)
- Languages Fluent in German and English

ADDITIONAL DETAILS

Open Source Contributor & Maintainer (e.g. `GOOGLE-WEBFONTS-HELPER` with 1900+ stars); Attendee and show presenter in conferences and meet-ups; Full, clean driving licence; Willing and able to relocate within the European Union
